Volume 32 1976

Mathematical Biosciences

an international journal

ELSEVIER NEW YORK

Editor **John A. Jacquez**

Editorial Assistant

MRS. MARIANNE JACQUEZ
490 Huntington Drive
Ann Arbor, Michigan 48104

Associate Editors

RICHARD BELLMAN
Founding Editor
Department of Electrical Engineering
University of Southern California
Los Angeles, California 90007

CHARLES J. MODE
Department of Mathematics and
Institute for Population Studies
Drexel University
Philadelphia, Pennsylvania 19104

Editorial Board

RUTHERFORD ARIS
Department of Chemical Engineering
and Materials Science
University of Minnesota
KARL J. ASTROM
Lund Institute of Technology
Lund 7, Sweden
GEORGE A. BEKEY
Biomedical Engineering
University of Southern California
CHIN L. CHIANG
Dept. of Biomedical and
Environmental Health Sciences
University of California, Berkeley
KENNETH M. COLBY
Neuro-Psychiatric Institute
760 Westwood Plaza
Los Angeles, California 90024
GEORGE F. ESTABROOK
Department of Botany
The University of Michigan
JOHN Z. HEARON
National Institute of Arthritis
Bethesda, Maryland 20014
BIRGER JANSSON
M.D. Anderson Hospital
and Tumor Institute
Houston, Texas 77025
SAMUEL KARLIN
Department of Mathematics
Stanford University
ROBERT M. MAY
Department of Biology
Princeton University
JANE MENKEN
Office of Population Research
Princeton University
CAROL NEWTON
Department of Biomathematics
University of California, Los Angeles
JERZY NEYMAN
Department of Statistics
University of California, Berkeley
JOHN RINZEL
National Institute of Arthritis
Bethesda, Maryland 20014
MICHAEL A. SAVAGEAU
Department of Microbiology
The University of Michigan
LAWRENCE STARK
Physiological Optics
University of California, Berkeley
R. VASUDEVAN
Institute of Mathematical Sciences
Madras 20, India
KENNETH E.F. WATT
Department of Zoology
University of California, Davis

Mathematical Biosciences

an international journal

Volume 32 1976

K. H. Wickwire and D. Guest (Birmingham, England)
Optimal Control Policies for Reducing the Maximum Size of a Closed Epidemic—II. Stochastic Dynamics 1

Harry A. Guess (Research Triangle Park, NC) and Kenny S. Crump (Ruston, LA)
Low-Dose-Rate Extrapolation of Data from Animal Carcinogenicity Experiments—Analysis of a New Statistical Technique 15

William F. Pickard (Saint Louis, MO) and Jerome Y. Lettvin (Cambridge, MA)
A Physical Model for the Passage of Ions through an Ion-specific Channel—I. The Sodium-like Channel 37

William F. Pickard (Saint Louis, MO)
A Physical Model for the Passage of Ions through an Ion-specific Channel—II. The Potassium-like Channel 51

S. N. Biswas and B. B. Karmakar (New Delhi, India)
A Solvable Model in Population Dynamics 63

Bernard Lachet (Grenoble, France)
Simultaneous Fitting of All the Parameters for a Family of Clonal Survival Curves with Cellular Recovery 73

Yasuo Komota (Sendai, Japan), Kokichi Futatsugi (Tokyo, Japan) and Masayuki Kimura (Sendai, Japan)
On Markov Chains Generated by Markovian Controlled Markov Systems—I. Ergodic Properties 81

W. A. Little (Stanford, CA), Karen O. Ng and Gordon L. Shaw (Irvine, CA)
Absence of Bounds of Products of Normalized Eigenvector Components of Non-symmetric Probability Matrices 107

Charles J. Mode (Philadelphia, PA)
A Large Sample Investigation of a Multiple Decrement Life Table Estimator 111

Peter Purdue (Lexington, KY)
An Urn Model for Some Evolutionary Processes 125

Michael E. Gilpin (La Jolla, CA), Ted J. Case and
Francisco J. Ayala (Davis, CA)
θ-Selection 131

John K. Dienes (Los Alamos, NM)
The Mathematics of Recirculation
and the Measurement of Cardiac Output 141

K. Gopalsamy (Bedford Park, Australia)
Optimal Control of Age-Dependent Populations 155

Roger V. Jean (Rimouski, Canada)
Growth Matrices in Phyllotaxis 165

J. Barclay Adams (Boston, MA)
A Probability Model of Medical Reasoning and the MYCIN Model 177

David B. Stewart (Clayton, Australia)
A Supercritical Branching Process
with State Dependent Immigration 187

Robert J. Sclabassi (Los Angeles, CA)
Neuronal Models, Spike Trains,
and the Inverse Problem 203

Hitoshi Nagami, Tadahiro Kitahashi,
and Kokich Tanaka (Toyonaka, Osaka, Japan)
Characterization of Dynamical Behavior
Associated with a Single Neural Equation 221

P. Delattre (Gif-Sur-Yvette, France)
Transformation Systems with
Time-Dependent Characteristics and Population Theory 239

Richard E. Plant (Davis, CA)
A Simple Model for the
Crustacean Cardiac Pacemaker Control System 275

Richard E. Plant (Davis, CA)
Analysis of a Model for the Crustacean Cardiac Pacemaker 291

John A. Jacques, David Foster
and Eugene Daniels (Ann Arbor, MI)
Solute Concentration in the Kidney—
I. A Model of the Renal Medulla and Its Limit Cases 307

David Foster, John A. Jacquez
and Eugene Daniels (Ann Arbor, MI)
Solute Concentration in the Kidney—
II. Input-Output Studies on a Central Core Model 337
